

XnView

Good open source software to get images metadata (<https://www.xnview.com>)

How to add GPS coordinates to a selection of images :

When images have coordinates, AddaxAI will use these ones to generate a dynamic web map, in addition of graphics :

The screenshot shows the 'Generate file listing' dialog box in the 'EXIF Viewer' application. The dialog is overlaid on a grid of image thumbnails. The 'Options' section includes checkboxes for 'Header', 'Filename', 'Include the full path', 'Replace \'\' with \'\'', 'Size' (set to 'bytes'), 'Type', 'Date', 'EXIF Date', 'Properties', 'Description', and 'Comment'. There are also checkboxes for 'Include subfolders', 'Copy to clipboard', and 'CSV format'. 'OK' and 'Cancel' buttons are at the bottom.
